

**CONVERSATION WITH
EGGSTÖCKE**

Haus Heuerberg
Braunwald
November 2023

Thank you
Angela and Leo

Eggstöcke

This place is closely related to the bottom of the earth.

**This place was originally the bottom of the earth.
The essence of the earth is in this place.**

**This place has a profound sense of the earth's
essence and origins.**

There is an infinite source of life here.

There is creativity of the earth here.

**Infinity sparks creativity, transforming nothingness (0)
into something new (1).**

**Touching infinity allows one to break through the
repetitive cycles of everyday life and connect with
the divine essence of existence.**

Eggstöcke

You have not yet fully immersed yourself in
and connected with the nature.

Immersing yourself in nature allows you to
broaden your sense of self.

The scope of how you see yourself.

You are the insect. You are the tree.
They are extensions of yourself.

When you feel the breath of nature,
you will hear the nature speaking to you.

We share a breath.

We share the heartbeat of the earth.

Have a broad sense of self.

You will transcend mountains and rivers and everything.

You are bigger than you think.

Bigger and greater than you think you are.

The mind is caught up in the details of daily life
because you don't realize your own greatness.

Your greatness transcends the limits of the body.

Truth is hidden behind the waves of quiet breathing.

Breathe as a part of nature.

By breathing as a part of nature,

the natural environment will be harmonised.

Eggstöcke

The saints perceive a reflection of their own humanity in all others.

The essence of self exists in everyone.

The essence that connects all is also part of yourself.

The energy of the universe creates and causes all things.

If you do not understand the root cause of all things, you will be misled and never get anywhere.

From here, I see all phenomena as mere shades of color. In the end, they are nothing more than refraction of light.

If you change the way you look at
If you change the position you look from
The intensity of color will change.
That's all there is to it.

You are confused by the intensity of color
You study colors, analyse colors
But if you do not understand the origin of light
You will only be deceived by the phenomenon of colors.

People are deceived.

This is the word that symbolizes the phenomena that occur on the surface of the earth today.

Touch the cause of all phenomena.

Understand the origin of things.

Then you have a calm and cool mind towards phenomena.

Be in touch with the origin of energy and aware of the cause of all problems.

Things will calm down.

Without understanding the cause it will be difficult to solve the problem.

Use this energy of creation to bring everything back to its original state.

If you love the earth,
Love this original energy
and keep it as a part of yourself.

How long are you stuck in the intensity of color?
I want you to realize that you are spinning out of control.

EGGSTÖCKE

Remember that we live on Earth.
Always connect and interact with the earth.

Earth is within yourself.
Connect to the center of the core earth.

We are not going anywhere.
Bring your heart in to it.

The earth has a strong power.
You may feel connected, yet there are possibility to
forge even deeper connection.

Believe in the power of the earth.
Once you connect with the earth,
Success on earth is easy.

The nature will put you in right place at right time.

If you don't connect with the earth
You will be spinning towards the opposite direction.

Live with the earth.
This is the only way.

Always keep your consciousness here.
The Earth will always be on your side.

Remember to make contact with the earth.

It will take you where you need to be
when you need to be

Earth is one life form.
As a cell of the earth
The decision is in your hands
To exist as cancer cell or
To be the light cell

When you function as part of the earth
You will have your calling.

If you function as a part of the earth
then all the arrangements will be made here.

Believe the earth
Trust the earth and nature
and let its heartbeat be your heartbeat too.
